Seventh International Congress on Construction History

Name: Fernandes Póvoas

First name: Rui

Function: Full Professor

Affiliation: CEAU/Faculty of Architecture, University of Porto

Country: Portugal

Email: [rpovas@arq.up.pt](mailto:rpovas@arq.up.pt)

**CV:** Habilitation in Architecture; Ph.D. in Civil Engineering; M.Sc. in Structural Engineering; Graduation in Civil Engineering: University of Porto. The scientific activity has been initially inscribed in the field of Computational Mechanics (numerical modelling of concrete structures). In a more recent period, his research interest has been focused in the areas of Conservation and Rehabilitation of Built Heritage, Construction History and structural education for architects. Concerning the main interests on Construction History, they are related with the introduction and development of concrete in Portugal, focusing, in particular, in the cooperative role of architects and
